

Web Development Project Guidelines Purpose:

The purpose of this project is to design, develop, and publish a website using recommended web design practices. Your project will demonstrate mastery of the web development skills and concepts learned in this course.

Hosting Requirements:

You are required to publish your website on the Internet. Your site **must be hosted on an ad-free host**. Begin searching now for a suitable host. There are many free hosting options available online. You can also refer to **Resources > Ad Free Web Site Hosting** to get started.

- Example free host: [GitHub Project Topics](#):

Your website may focus on a personal interest, hobby, family business, religious organization (church, mosque, synagogue), club, company, or workplace.

Originality:

The project must be your own design. **Use of free or purchased templates is not allowed**, including:

- Dreamweaver templates
- Blog or social networking templates (WordPress, Blogger, Drupal, Wix, Facebook, etc.)
- Textbook Case Study Lab templates

Note: If a web template is used, your project grade will be limited to "Below Average" (D).

What Counts as a Web Page:

A page must:

- Be consistent with the overall site design
- Contain **text and images that provide value** to your target audience
- Pages with little content, or pages that are just images or PDFs, **will not count** toward your page total

Project Requirements

Minimum Content:

- **1 Home Page • 6–10 Content Pages** • Each page must:
 - Include text and images that provide information and value to the audience
 - Adhere to **Section 508 accessibility standards**
 - Contain appropriate **page titles**
 - Include appropriate **meta tags**
- Example: `<meta name="description" content="Low-cost Daycare service">`

Additional Requirements:

- **1 Table** effectively utilizing data
- **1 E-mail link**
- **1 External link**
- **1 Form** with at least 4 fields
 - Server-side processing is optional
- Must reside on your project site (external forms not allowed)
- Should display a confirmation page after submission
- **1 External CSS file** with at least 6 defined styles

Project Restrictions

The project **must not include**:

- Mail handlers provided in course assignments (e.g., ASP, CGI scripts) as the form action
- <frames> based pages
- <table> based layout pages
- <iframe> based pages
- Image-only pages (with little or no text/content)
- Spry Widgets (Dreamweaver)
- tags or inline, embedded, physical, or logical styles

Milestones	Due date:	Points:
Topic Approval – Student Instructions: Before you move on to the next part of your project, your topic must be approved. To get approval, you need to: 1. Choose your topic – This will also be the name of your website URL. 2. List your pages – Provide a list of all the pages you plan to create (this will be your navigation menu). Make sure both your topic and page list are clear and complete so you can move forward smoothly.	March 10 th , 2025	10pts
Wireframe	April 7 th , 2026	15 pts
Site Map	April 16 th , 2026	15 pts

Planning Analysis Sheet	April 21 st , 2026	15 pts
Final Project Update	April 28th, 2026	20 pts
Publish project, upload to Brightspace & Presentation	May 5th, 2026	150 pts
Upload your final project. It replaces the final exam	May 5 th , and 7 th , 2026	Points: 400

Your website project will be evaluated based on the following criteria:

- **Accomplishment of Project Objectives** – How well your website meets the goals and purpose outlined in your project plan.
- **Contains Required Elements (Rubric)** – Inclusion of all mandatory pages, content, tables, images, and accessibility standards as specified in the rubric.
- **Visually Appealing** – Overall aesthetics, including layout, color scheme, typography, and image use.
- **Application of Design Principles** – Effective use of design principles such as balance, contrast, alignment, proximity, and consistency.

Project Milestones: Web Site Topic Approval

Before moving forward with your web site project, the topic of your web site must be approved by your instructor. To obtain approval, provide a detailed, single paragraph addressing the following questions:

1. **Purpose:** What is the purpose of your web site?
2. **Goals:** What do you want the web site to accomplish?

3. **Audience:** Who is your intended audience?
4. **Problem or Opportunity:** What opportunity, problem, or issue does your site address?
5. **Content:** What type of content might be included on your site?
6. **Related Sites:** List at least two related or similar web sites found on the Internet and explain why you chose them.

Your response should be comprehensive, clearly written, and demonstrate thoughtful planning for your project. **Topic Approval and Planning Analysis Sheet**

Topic Approval:

Your web site topic must be approved before you begin work on the next milestone.

1. What is the purpose of the site?
2. What do you want the website to accomplish?
3. Who is your intended audience?
4. What opportunities, problems, or issues does your site address?
5. What type of content will be included on your site?
6. List at least two related or similar websites found on the World Wide Web.
7. Explain why you chose those websites.

Planning Analysis Sheet

Create this document for review before moving on to the next phase of your project. Make sure to include the following sections:

1. Web Site Goal

Write one or two sentences (or more, if necessary) describing the main goal of your website.

2. What Results Do I Want to See?

List the working titles of your web pages. You should have between six and ten titles.

3. What Information Do I Need?

Identify the sources of your content (facts, text, graphics, sounds, and videos) for the pages listed above. Be sure to respect copyright and use materials appropriately.

4. How Will My Project Use a Form?

Explain how you plan to use a form in your project to collect information. Possible uses include:

- Collecting feedback
- Conducting surveys or polls • Offering newsletter subscriptions ○ Other interactive purposes

1. Web Site Goal

- Describe the goal of your web site in one or two sentences (or more if necessary).

2. Desired Results

- Specify the results you want to achieve with your website.

3. Page Titles

- List the working title of each page on your site. You should include between six and ten working titles.

4. Required Information

- 5. ○ Identify the content you will need (facts, text, graphics, sounds, videos, etc.) for the pages listed above.
- Include the sources where you will obtain this content and ensure you respect copyright laws.

6. Use of Forms

○ Describe how your project will use a form to collect information. Examples include offering feedback, conducting a survey or poll, providing subscriptions to a newsletter, etc.

1. Wireframe:

Use a computer application to create a wireframe for a sample page of your website. Your wireframe should clearly show the following elements:

- Logo
- Navigation menu
- Main content area
- Footer

You may use any graphics application to create your wireframe. Save the file as a **.gif** or **.jpg**. **HTML code is not required** for this assignment.

2. Site Map:

Create a flowchart (storyboard) of your website that illustrates the hierarchy of pages and the relationships between them. You may use a word processor, PowerPoint, or even draw it by hand using a ruler and pencil. Refer to your textbook for additional guidance on site maps.

3. Project Update Meeting:

By the time of the Project Update Meeting, you should have **at least six pages of your website completed**. These pages should be published online or ready to be published. Unless other arrangements are made, the meetings will be held during class lab time.

Prepare the following to discuss with your instructor:

- The **URL** of your website
- A **sketch of your form** (if applicable)
- Your **Site Map** (revise as needed)

Final Project Rubric (300 pts)

Criteria	Points	Description
Project Objectives	60	Project meets the stated goals and demonstrates understanding of web development concepts.
Content Pages	65	Includes 1 home page and 6–10 content pages with appropriate, informative text and images.
Design & Visual Appeal	50	Layout is visually appealing, professional, and consistent across pages; it uses design principles effectively.
Accessibility (Section 508 Standards)	40	All pages meet accessibility standards (e.g., alt text, readable fonts, proper contrast).
Navigation & Usability	50	Navigation is intuitive; links function correctly; users can easily find information.
Tables & Data Presentation	50	At least one table is used effectively to display data.

Page Titles & Metadata	35	Each page includes clear, descriptive titles.
Overall Functionality	50	Site is fully functional with working links, forms (if any), and media elements.

Total: 400 pts
